

My Mosler Biography:

Bonnie Allen - I started working at the Mosler Safe Company on the day that I graduated from high school in 1969, working as a Clerk for Adrian Scherer and Jim Cumpson in Production Control.

After working in Production for several years, I transferred to the Engineering Department and became Secretary to Pat Conroy, Manager of the Commercial Engineering Department. I then went on to work for Dick Scully, Director, Bank and Commercial Engineering. After Dick retired, I continued to work in the Engineering Department for Nick Maus who replaced Dick Scully

In 1986, I transferred to the Currency Handling Division working for Jim HusVar as Administrative Assistant, and later became the Inventory & Control Specialist under Peter McInerney who had taken over the Currency Handling Division when Jim left Mosler.

I continued working for Peter and the Currency Handling group until 2001 when Mosler closed.

I currently live in Hamilton and work for an attorney in Fairfield along with my good friend and former Moslerite, Sandy Baker.
