

My Mosler Biography:

Chester Millay

I started working for Mosler in 1976 as a service technician in the Cincinnati branch. Mel Aston was the branch manager, Steve Trepkus the service manager and Paul Schnitker the installation manager. Paul Schnitker eventually took over as branch manager.

In 1988 I became the branch installation/service manager of the Cincinnati branch as Paul assumed the branch manager duties for the new Dayton branch.

After my position of branch manager (not sure of the dates), I moved to the corporate office in Fairfield to be part of the S2000 project which was the new service management software Mosler would use to begin central dispatch. I was attached to the IT group.
