

My Mosler Biography:

Don Robinson - I was working for Federal Electric Corp. the service division for IIT companies when Airmatics designed and built the first Autobanker for Mosler.

It was installed at FNB Waukesha WI. I was in Wisconsin at the time, and assisted in the installation and service of this product. When Mosler acquired Airmatics, they hired the field service personnel maintaining the new Mosler systems.

I reported to Bill Toepfer at the Milwaukee office.

Dee Grover asked me to relocate to Hamilton to set up national training and support for the product. I reported to Ed Heineman.

During my time in Tech Services I provided support and training on AB, MIS410, Comsec, Invisicom and Computer based systems.

In 1973, I returned to Chicago as the Area Tech Specialist for the Great Lakes Region. I continued to provide support and training on Mosler systems and with the acquisition of LeFebure, provided cross training for service techs on both products.

I retired in 2000 after 38 years of service. My wife Geri and I now reside in Schaumburg, IL.
